

One Touch sweeping minimising your operational costs

SW4000 is a ride-on sweeper with high dump designed for maximum performance, reliability, minimizing downtime and your operational costs. It is the obvious choice for industry and manufacturing, warehouses, distribution centers, school yards, shopping malls, parking lots, sport centers, recycling facilities, multi-storey car parks and more. It is equally suitable for outdoors as indoors cleaning depending on selected power source, battery or petrol (only outdoors).

One Touch Sweeping is one of the key features making it easy, economically and safe to operate the SW4000. With this system, all functions – main broom, side brooms, vacuum fan and the optional DustGuard - are activated and terminated simultaneously so that no brooms or fans are running needlessly, when the sweeper stands still. The side brooms have no belts that can break or need change, thus reducing wear and costs of ownership.

Maintenance is easy since no tools are needed for broom and filter removal, and easy access to all components makes maintenance and service fast and uncomplicated. The foam-filled wheels do not go flat or need refills, but add to reliability and comfort.

The retractable hopper can be closed from operator compartment allowing the operator to drive away immediately after dumping into a container. The comfortable compartment is easy to access, has adjustable seat and provides an unobstructed view of the brooms and working area. SW4000 is tough on debris and gentle on the environment.

Picture shown may not represent model quoted

- One Touch Sweeping makes it easy to operate SW4000 since all functions – main broom, side brooms, vacuum fan and the optional DustGuard are activated and terminated simultaneously
- SW4000 is also gentle to the environment with minimized energy consumption, recyclable materials, dust control and low noise level
- The retractable, spring loaded side brooms, spring away on impacts, which means that they do not break or damage the inventory they touch
- The optional DustGuard™ misting system adds to the dust free sweeping improving the environment for operator as well as the surroundings
- The high hydraulic dump ensures safe handling and fast dumping increasing the high productivity level and reliability of SW4000
- All systems are controlled by the motion pedal, it saves power and broom wear and since all moving parts are run by electric motors they only consume energy when running
- The comfortable operator compartment is easy to access, has adjustable seat and the retractable hopper can be closed from the compartment
